

Chief's report 8/12/-9/12/14

8/13 caller reported seeing and smelling propane leaking from a propane truck parked by the museum across from the school. We responded to call to be notified that owner of truck started vehicle, drove through town to the pub restaurant to their propane tank to transfer propane from truck to the pub's tank. The fire department protocol would have been to spray water on the tank to cool it until the relief valve closed. Owner was asked to provide proof of mandatory tank testing documentation.

8/25 fire/emt toned out for kayaker separated from kayak near Big Bay State Park. We responded and sent out spotters. Shortly after we were notified that kayaker was on shore. This was confirmed by law enforcement, the parks department and dispatch. Emt's were on standby to receive patient. Fire department and law enforcement stood down.

8/30 responded to boat fire at marina, fire department extinguished fire caused by electrical cooking stove.
